Streamline — Q1 2026 Investor Update

Confidential | April 15, 2026 | For Authorized Recipients Only

Executive Summary

Q1 2026 was Streamline's strongest quarter to date. We crossed $12M ARR, grew revenue 41% year-over-year, improved gross margin to 74%, and signed our first two enterprise contracts above $500K ACV. Churn remained below 4% annually, and our net revenue retention reached 121% — a record. We ended the quarter with $28.4M cash, giving us a runway of approximately 22 months at current burn.

Key Metrics

Metric	Q1 2026	Q4 2025	Q1 2025	YoY Change
ARR	$12.1M	$10.4M	$8.6M	+41%
Revenue (Quarter)	$2.87M	$2.51M	$2.03M	+41%
Gross Margin	74%	71%	68%	+6pp
Net Revenue Retention	121%	117%	109%	+12pp
Annual Churn	3.8%	4.1%	5.2%	-1.4pp
Customers	487	423	312	+56%
Employees (FTE)	84	76	51	+65%
Cash & Equivalents	$28.4M	$31.1M	—	—
Monthly Burn	$980K	$920K	—	—

Product Highlights

AI Workflow Engine (GA — February 2026): Our AI-powered workflow automation engine reached general availability in February. As of March 31, 847 workflows have been created by 203 customers. Average time-to-value dropped from 14 days to 3 days for new customers who adopt AI workflows in their first week. This feature is now our top driver of expansion revenue.

Salesforce Integration (GA — March 2026): Native two-way Salesforce sync launched in March. 67 customers activated within the first 30 days — our fastest integration adoption ever. Salesforce customers show 34% higher NRR than non-Salesforce customers, validating the strategic bet.

Mobile App v3.0 (GA — January 2026): Rebuilt on React Native with a new design system. App Store rating improved from 3.8 to 4.6. DAU/MAU ratio on mobile improved from 28% to 41%.

Sales & Go-To-Market

We ended Q1 with 23 quota-carrying sales reps, up from 18 at the start of the quarter. Average ramp time to quota attainment is 4.2 months. Q1 quota attainment across the team was 94%. Our two largest deals — Meridian Financial ($640K ACV) and Pacific Health Group ($510K ACV) — both closed in

March and are expected to contribute to Q2 revenue from April onward.

Pipeline entering Q2 is $8.3M in weighted value, up 62% from the same point last year. Our largest pipeline segment is mid-market (200–2,000 employees) at 58% of weighted pipeline. Enterprise (2,000+ employees) represents 31% of weighted pipeline but only 11% of current customers — our enterprise motion is still early.

Headcount & Hiring

We ended Q1 at 84 FTEs. Planned hiring in Q2: 8 engineers (4 backend, 2 ML, 1 DevOps, 1 QA), 4 sales reps, 2 customer success managers, 1 head of data. We expect to reach 100 FTEs by end of Q2. Our offer acceptance rate in Q1 was 81%, down from 87% in Q4 — we are reviewing compensation bands to remain competitive, particularly for senior ML roles where market rates have increased significantly.

Risks and Challenges

Sales hiring velocity: We are behind on hiring AEs for the enterprise segment. Two offers were declined in Q1 due to compensation. We are increasing enterprise AE OTE by 12% effective Q2.

Gross margin pressure: Cloud infrastructure costs grew 28% in Q1 driven by AI inference workloads. We are evaluating a dedicated GPU cluster vs. continued use of on-demand cloud GPUs. Decision expected in Q2.

Enterprise implementation complexity: Our two new enterprise customers required significantly more implementation support than modeled. We are building a dedicated enterprise implementation team (2 headcount in Q2 hiring plan).

Q2 2026 Outlook

Q2 guidance: $3.3M–$3.5M revenue, $13.8M–$14.4M ARR exiting the quarter. Key milestones: close 3 additional enterprise deals, launch self-serve onboarding for SMB, complete Series B fundraise (process beginning May 1).
